

**THE
ENTERPRISE
CENTRE**

Adobe Photoshop CS3

Level 1

2 Days

Workshop Goal

This **two day** hands-on workshop will help participants become efficient in the basic use of Adobe Photoshop CS3. By creating a solid understanding of the process of photo manipulation, participants will gain insight and skills that will increase their productivity. Participants will also be introduced to the specifics of creating or manipulating photos for commercial press, home printing, or web specific use. We encourage participants to bring their own digital photos to further enhance the learning process. In addition, we welcome participants to bring their digital cameras as well.

Topic Outline

Exploring the Photoshop Environment
Working with Image Areas
Working with Layers
Enhancing Images
Saving Images for Web and Print
Managing Assets with Adobe Bridge

Recommended Prior Learning

Students attending this course should have a strong understanding of Windows fundamentals such as saving, relocating, renaming and retrieving files.
