1 Day

Workshop Goal

This **1-day hands-on** workshop is designed for users with the Basic knowledge of Visio 2003. Participants will get the most out of this course if their goal is to become proficient in creating technical layouts, advanced custom shape design, various business diagrams and Web site maps. Students will also learn how to integrate Visio with different applications.

Course Objectives:

- Create, assign and customize layers; modify the drawing scales; and add and modify dimension lines.
- Create complex shapes, create and edit formulas and functions by using special drawing operations and create custom stencils.
- Create block diagrams, flowcharts, organization charts, and project management diagrams.
- Create and customize a detailed network diagram, generate a report on network data, generate a Web site map and a report of Web site links.
- Create a program window and system diagram, and create a database model diagram.

Recommended Prior Learning:

Completion of the **Windows or Window XP** and **Visio Professional 2003 Introduction** workshop. You should also be familiar with personal computers and the use of a keyboard and a mouse.
